

Basalite® Project Experience - *Double Stack Retaining Walls*

Private Home - St. Helena, CA

Built by Lance Wright Construction of Santa Rosa, CA, Basalite Geo Wall Max Unit double-stacked walls were the answer for this private home's retaining wall issue.

Double stacked Geo-Wall units can be used in heights up to 12', depending on soil condition, when there is no room for geogrid tiebacks.

This project was designed by Bartelt Engineering in Napa, CA.
