

# Basalite® Project Experience - Retaining Walls

## Lowe's - Fairfield, CA

Lowe's Home Improvement Center of Fairfield, California is situated on a challenging lot, which includes significant grade changes. To address parking needs, approximately 40,000 sq. ft of beveled GEOWALL, manufactured by Basalite Concrete Products, was installed by Castle Retaining Walls of Seattle, Washington. The Basalite GEOWALL was chosen by the City of Fairfield and designed by Sage Structural Engineering of Granite Bay, California. The project was completed in Fall of 2011.
