SAKRETE®

Concrete Expansion Joint

SAKRETE Concrete Expansion joint replaces outdated asphalt and fiber expansion joints. Use wherever expansion joints are applicable, Slabs, drives, sidewalks, isolation joints, etc. SAKRETE Concrete Expansion Joint helps avoid slab cracking, keeps concrete from expanding and pushing against existing walls and slabs. It is flexible and will shape to any surface, even around square corners. Closed cell construction allows no water absorption. Resistant to common oils and chemical due to high quality non-absorbent polyethylene. EXCEEDS ASTM D-4819/D-3575.
